Full-Stack Developer (Student Job)
FAITH/LifeCity & Andriod App

Discription:

Lifecity is a digital conversation tool that supports social workers in their counseling sessions with children. It helps children talk about difficult subjects.

Tasks:

- Webapp was built with React.
- We used firebase as our backend and also used some features from Google cloud.
- We also built a small python backend for encryption.

Technologies:

- React, Firebase, Google cloud, Python.

HoGent

Full-Stack Developer (Internship)
FAITH/LifeCity

Discription:

Lifecity is a digital conversation tool that supports social workers in their counseling sessions with children. It helps children talk about difficult subjects.

Tasks:

- Supporting the webapp and now also the android app,
- Building extra features for the webapp and android app.

Technologies:

- Kotlin
